COMPANY BRIEF HISTORY

Linx Networks Ltd is a privately owned IT company that is committed to providing quality services and Business Solutions to our clients. We are a group of Motivated, Trained, Talented and Dedicated professionals: we place our clients needs and expectation above and beyond everything else, while maintaining diligence and integrity in all our dealings. Try us today and we are sure of exceeding your expectation. Linx- Networks Ltd is an indigenous ICT company that specializes in Hardware supply and installation, Local Area Networks (LAN), Metropolitan Area Networks (MAN), Wide Area Network (WAN) installation, Data Center Infrastructure provisioning as well as outsourced services with head quarter in Lagos Nigeria and support outlets in Abuja, Portharcourt and Owerri. Linx-Networks Ltd was birth practically to put an end to the problem often associated with the Hardware and Network infrastructure procurement, deployment and support thereby guaranteeing the longevity of such deployment and improved return on investment. We will achieve this through provision of genuine and qualitative product deployed professionally by seasoned professionals. We then consolidate the success recorded at the deployment stage by offering qualitative support service through our professional service practice for our installed base and our clients' existing infrastructure alike.

Our Principal Partners

RADWIN

Microsoft Partner

Home Automation | Access Control | CCTV Installation

Ever thought of **TURNING YOUR HOME** into a **SMART HOME**?

*wouldn't you love to be able to switch off the lights you left after you've got to the office?
Or turn the Home/Office Access Control System*

Access Control

Access control systems are the electronic systems that are designed to control through a network and they should have an access to a network Smart Security Surveillance System

What many people don't know however is that there are a variety of different types of CCTV camera which suit different situations or premises and that selecting the proper camera for the right application really is vital

Home Automation

Home automation has been around for many decades in terms of lighting and simple appliance control
